

ENGINEERED FOR STRENGTH.

SQUARE TUBING TRUSSES

Custom-built truss systems fabricated from structural square tubing — delivering unmatched rigidity, load distribution, and long-term performance for heavy industrial applications.

WHAT WE BUILD

BUILT SQUARE. BUILT STRONG.

Our square tubing trusses are engineered and fabricated to meet exact project specifications. Whether you need a custom-span gable truss, lean-to truss, or a specialized industrial frame, Goldin Metals delivers structural integrity you can count on.

KEY BENEFITS

- Superior strength vs. angle iron trusses
- Consistent weld surfaces for cleaner, stronger joints
- Easier bolt-up connections with 3/8" connection plates
- Excellent torsional rigidity under dynamic loads
- Custom fabricated to exact span, pitch & styles
- Industrial enamel coating with custom options

APPLICATIONS

BARNDOMINIUMS

Engineered steel trusses provide open-span strength and modern aesthetics for residential-style metal homes.

AGRICULTURAL BUILDINGS & POLE BARNs

Durable square tubing trusses deliver long-lasting support for barns, equipment sheds, and livestock structures.

INDUSTRIAL BUILDINGS & WAREHOUSES

Heavy-duty truss systems ensure stability and load capacity for large-scale industrial and storage facilities.

EQUIPMENT, RV & BOAT STORAGE

Custom truss designs create wide, unobstructed bays ideal for protecting vehicles, trailers, and heavy equipment.

COMMERCIAL STEEL FABRICATION

Precision-built trusses integrate seamlessly into commercial steel projects, offering reliability and structural integrity.

FAST-TRACK FABRICATION

Most standard size trusses are kept in stock. Custom sizes ship within 4–5 weeks. Rush timelines available — contact us for more info.
